免疫原

The exact immunogen used to generate this antibody is proprietary information.

特异性

The immunogen used for this product shares 6 continuous identical amino acids with eEF1A2. Cross-reactivity with this protein has not been confirmed experimentally.EE1AL3/EEF1A1P5 it's a suspected pseudogene (https://www.ncbi.nlm.nih.gov/gene/158078). Our validation shows that this clone is able to detect Recombinant EF1AL3/EEF1A1P5 but endogenous protein expression is yet unknown.
